Stabilised aq. 2-alkyl-4,6-dinitro-phenol ester dispersions - contg.
metallised dye, used as fungicides, acaricides or herbicides

Priority Data (CC No Date): DE 2412324 (740314)

Abstract (Basic): Aq. dispersions of 2-alkyl-4,6-dinitrophenol esters (I) contain as stabiliser 0.1-3 (pref. 0.3-1) wt. % of a metal complex dye (II) of the azo or phthalocyanine series. The dispersions are used as fungicides and/or acaricides or herbicides. Presence of (II) prevents the crystal growth normally occurring on storage of such dispersions (e.g. a dispersion contg. <10 μ crystals normally contains crystals up to 50 μ long after 2-3 months), which leads to decrease of biological activity.
